You can File info File Size 0.89 MB Uncompressed 0.89 MB File Created 2007-03-25 File Last Accessed 2010-02-25 File Modified 2010-02-27 Install So you like the File Viewer because of its simplicity. You have no need for any technical knowledge, and you know that you don't have to worry about efficiency or how to manage memory. This, that, or the other, you have not given too much thought as the File Viewer is working fine without any problems. You have found your ideal tool for working with files on your computer. File Viewer does require some technical knowledge. You have learned how to open a directory in the Explorer of Windows, and you know how to choose a search directory. You've downloaded the tool, and you know that you have to run it and then configure it a little. Perhaps you tried to set the other options in the other ways: the values set them up yourself. Then in the background, you knew that they were for the path and file size, which you previously saved to disk. You knew the limits, too, so that you would not end up with a memory overflow. Now you have installed the File Viewer, and you're interested in the configuration options. You have not worked with these options before, so you have to adjust them properly. You need to set the search path, you need to set the file size limit, and maybe the time limit also. These are the best things for a file viewer. You will continue to work with them as time goes on. Now you have everything set up, and it's time to test whether the File Viewer works for you. You have no one but your computer for testing. You have not saved anything to disk, so you have no files to test. You only need to
